PRESENTED BY CLINIC PRO SOFTWARE INC.
MARILYN K. GARD, CEO, MBA

CLINICpro™

VISIONARY, AUTHOR, PHILANTHROPIST MENTOR and LEADER

Marilyn Graduated from Michigan State University with a Masters in Business Administration. She has experience as a teacher, social worker, nursing home administrator and various other positions. She founded Clinicpro Software in 1994. Because of her experience in consulting for various offices, conducting insurance seminars, in practice management and office efficiency, she was able to design Clinicpro Software to maximize patient flow and productivity. She has been a guest speaker at Palmer College, many state organizations and has contributed articles to Chiropractic Economics, Today's Chiropractic and numerous state newsletters. Marilyn's vision has always lived in the forefront of software technology, she has been a leader in software development reaching into future based sectors always striving to deliver solutions leveraging efficiency and performance. The Clinic pro vision lives onwith the new team ensuring the legacy of our late founder moving forward. We carry forward her ideas creating a highly powered intelligent connected softwares reachinginto the future universe of software solutions for clinical practices globally

ABOUT CLINICPRO

ClinicPro practice management software is used for chiropractic, pain management clinics, OB/GYN, ophthalmology, general practice, imaging centers and pediatric specialties. Because ClinicPro is so adaptable to the practice management needs of any specialty, ClinicPro software can interface with the electronic claims clearinghouse of your choice often at no charge.

INTEGRATED HEALTHCARE SYSTEMS

The patient experience is highly substantial for the healthcare industry to measure their quantity of success. The healthcare industry is highly fragmented. The industry lacks the ability to scale, and is handcuffed on flexibility, data interoperability, and advanced care coordination systems. CLINICpro solutions enable healthcare stakeholders the ability to transform the user experience, financial performance, and workflow efficiency are the best answer to the question 'what is integrated healthcare management.'

Our approach approach is to provide your organization the tools to provide the best care possible care delivery through cohesive service management and advanced delivery across healthcare sectors can make a difference. The patient's needs, preferences, health outcomes, and participation are the cornerstone of an integrated healthcare system. CLINICpro can add additional customized features to integrate into any practice delivering care solutions that offer seamless cohesion, information transparency, reliable coordination for efficient and appropriate treatment.

Billing Options With ClinicPro Software

Electronic claims: Clinic Pro Software offers electronic claims submission to a variety of clearinghouses such as Availity Office Ally, Gateway EDI, In-finedi, Claim MD. For doctors to practice in Michigan, you can send all of your claims direct to Blue Cross Blue Shield of Michigan at no cost. In some of the other states, Blue Cross Blue Shield and Medicare can be sent direct at no cost. Every state is slightly different but we can usually interface with a clearinghouse that offers free or low-cost claims.

Hardcopy Claims HCFA: Clinic Pro offers printing capability on HCFA forms that must be used for government payers such as BCBS, Medicare or Medicaid. In addition, Clinic Pro differentiates the rules needed for HCFA printing of Medicare forms versus printing of claims for commercial carriers. For commercial payers, the forms can be printed on plain paper after previewing the forms for accuracy.

Invoices: Depending on the attorney involved in the case, sometimes they request an invoice rather than a HCFA form to itemize charges for auto accident, Worker's Compensation or personal injury cases. Clinic Pro has the capability of either printing invoices or printing a copy of all of the transactions that have billed for the patient's case.

Transaction history: for PI attorneys that request a complete transaction history, you also have an option of printing the entire patient ledger.

Patient Statements: Clinic Pro Software has the capability of printing three different types of statements: summary, itemized or detailed on plain paper rather than specialized patient statement forms.

EMR (Electronic Medical Records) by Clinic Pro Software

The Clinic Pro EMR has proven its ability to produce high-quality notes in an efficient and timely manner yielding a high quality note without wasting time and money. By using a touchscreen computer like you see in all of the restaurants or a tablet PC that you carry from room to room, the doctor can record notes quickly, concentrating on patient care rather than note-taking. But, you can rest easy - despite how easy it is to use - your notes protect you in an audit.

Versatility - the ClinicPro EMR can be used with a mouse/keyboard, a touchscreen monitor or a tablet PC. If you do not want to invest in new equipment right away, you can use it on your regular office computer and upgrade your hardware as you have resources.

Features - throughout the EMR, you can dictate specialized notes using a program like DragonDictate. In addition, the ClinicPro EMR recognizes handwriting that is available on most tablet PCs.

Integration - the ClinicPro EMR is integrated with the ClinicPro practice management. It reads the appointment scheduler and gives the doctor an abbreviated list of patients that have arrived for their appointments. These are the patients that need to have encounters recorded. In addition, the doctor can indicate the procedures performed and have those procedures immediately transported to the patient's transaction card. By integrating with ClinicPro practice management, safeguards are built in against failure to input and bill for reimbursable services.

CLINICpro

CLINICpro End-to-end business intelligent solutions for healthcare.

Connected intelligent software solutions for everyone
